Energy performance certificate (EPC)				
65 Killaire Park BANGOR BT19 1EJ	Energy rating	Valid until: 3 June 2033 Certificate number: 0370-2932-7260-2307-0741		
Property type	Detached house			
Total floor area		153 square metres		

Energy rating and score

This property's current energy rating is E. It has the potential to be D.

<u>See how to improve this property's energy</u> <u>efficiency</u>.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in Northern Ireland:

the average energy rating is D the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Cavity wall, filled cavity	Average
Roof	Roof room(s), insulated	Poor
Window	Fully double glazed	Average
Main heating	Boiler and radiators, oil	Average
Main heating control	Programmer, TRVs and bypass	Average
Hot water	From main system	Average
Lighting	Low energy lighting in 39% of fixed outlets	Average
Floor	Suspended, no insulation (assumed)	N/A
Secondary heating	None	N/A

Primary energy use

The primary energy use for this property per year is 241 kilowatt hours per square metre (kWh/m2).

How this affects your energy bills

An average household would need to spend £3,157 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could **save £1,226 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2023** when this EPC was created. People living at the property may use different amounts of heating, hot water and lighting.

Environmental impact of this property		This property produces	9.7 tonnes of CO2
This property's current environmental impact rating is E. It has the potential to be D.		This property's potential production	5.9 tonnes of CO2
Properties get a rating from on how much carbon dioxic produce each year. CO2 ha	le (CO2) they `	You could improve this pro emissions by making the se This will help to protect the	uggested changes.

Changes you could make

Step	Typical installation cost	Typical yearly saving
1. Low energy lighting	£110	£103
2. Heating controls (room thermostat)	£350 - £450	£185
3. Room-in-roof insulation	£1,500 - £2,700	£693
4. Floor insulation (suspended floor)	£800 - £1,200	£246
5. Solar water heating	£4,000 - £6,000	£110
6. Solar photovoltaic panels	£3,500 - £5,500	£669

Help paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.
